

Deutsche Gesellschaft für Membrantechnik

Water and waste water treatment with membranes is a well-established global technology. The German Society for Membrane Technology, DGMT, will be hosting a workshop on the latest developments in membrane technology presented by our members. This event is kindly supported by the Messe München.

Membrane technology plays a significant role in the area of environmental protection.

The workshop will focus on the following three topics:

- MBR technologies
- Waste water and water supply
- Industrial waste water treatment and desalination

The first part of the workshop will cover the concepts and technical developments in the wide range of MBR technologies, followed by the second part on the topic of waste water and water supply. The final part will concentrate on the use of membranes in industrial waste water treatment and desalination technologies.

The workshop will appeal to people with a background in water works, plant manufacturing, water consultancy and construction. All lectures will be held in English.

The Workshop is free of charge. Please register online in advance to confirm your participation: www.dgmt.org

Registration

10	0:00 a.m.	Introduction Prof. Dr. Winfried Schmidt, Norbert Selzer, DGMT e.V. German Society for Membrane Technology
		MBR technologies
10	0:20 a. m.	Membranes and activated carbon – micro pollutant removal and more Dr. Sven Baumgarten, Nico Siegenthaler GE Water & Process Technologies Deutschland GmbH, Ratingen
10	0:40 a. m.	Water conservation – reducing industrial and domestic pollution Daniel C. Crawford, AQUANET, Berlin-Brandenburg
11	:00 a. m.	Cost Efficient Membrane Bioreactors – Myth or Reality? Dr. Christoph Thiemig, Koch Membrane Systems, Aachen
11	:20 a. m.	Modern leachate treatment with a MBR - RO - NF hybrid process Dr. Bernd Fitzke, WEHRLE Umwelt GmbH, Emmendingen
11	:40 a.m.	Modern flat sheet MBR modules for municipal waste water treatment Dr. Peter Ohle, newterra GmbH, Langgöns
n	oon	Lunch break

Waste water and water supply o1:00 p.m. Pressure driven membrane processes from module production to application Christoph Dittrich, CUT Membrane Technology GmbH, Erkrath 01:20 p.m. Ceramic membranes in different drinking & process water applications – an overview Dr. Anke-Gundula Roth, Dr. Christian Goebbert, Nanostone Water GmbH, Halberstadt 01:40 p.m. Milk protein fractionation by UF/MF in diafiltration mode: Considerations regarding replacement of fresh water as washing media by process streams Michael Reitmaier, Hans-Jürgen Heidebrecht, Prof.-Dr. Ulrich Kulozik, TU München 02:00 p.m. Optimized membrane and process technology for industrial water supply and disposal Tobias Steube, MICRODYN-NADIR GmbH, Wiesbaden o2:20 p.m. Coffee break

	Industrial waste water treatment and desalination
02:40 p.m.	Water 4.0 – Impact on small to large scale membrane based desalination systems Oliver Kopsch, Membran-Filtrations-Technik GmbH, Köln
03:00 p.m.	Membrane distillation for high saline and corrosive process water streams Christoph Maurer, memsys GmbH, Grafing
03:20 p.m.	Ceramic membranes for industrial waste water application – case studies Erich Koßin, atech innovations GmbH, Gladbeck
03:40 p.m.	Recycling of products by membrane processes Jürgen Müller, Osmo Membrane Systems GmbH, Münchingen
04:00 p.m.	Ceramic nanofiltration membranes for stable filtration of oily water and organic solvents Christian Pflieger, Dr. Hannes Richter, Dr. Ingolf Voigt, Dr. Marcus Weyd Fraunhofer-Institut IKTS, Hermsdorf Volker Prehn, Tobias Wölfel Inopor GmbH, Veilsdorf
04:20 p.m.	Discussion and End
